

AMENDMENTS TO THE SPECIFICATION

Please replace the Title with the following: WIND POWERED GENERATOR

Please replace Paragraph [0019] with the following paragraph rewritten in amendment format:

[0019] FIG. 9 shows FIG. 9 shows a simplified schematic (with cut-away sections) of the arrangement of the current generating means and the rotary parts of the wind powered generator shown in FIG. 1;

Please replace Paragraph [0070] with the following paragraph rewritten in amendment format:

[0070] FIG. 11 is a diagrammatic longitudinal section view through a wind powered generator 1101 embodying the present invention. Wind powered generator 1101 is similar in construction to wind powered generator 101, configured as a modular assembly. The axial shaft 1102 is configured in first, second, third and fourth sections 1103, 1104, 1105, 1106 corresponding to first, second and third rotary sections 1107, 1108, 1109 and generator electrical means section 1110 respectively. Each section 1103, 1104, 1105, 1106 is configured to be **releasably releasably** engageable with at least one other section. In the illustrated example, at least one end of each section 1103, 1104, 1105, 1106 is castellated.
